TO: All Employees  
FROM: Human Resources Department  
SUBJECT: Tuberculosis Examination

Maryland State Law requires that all school employees be certified as free from tuberculosis in a communicable stage. "Employees" is defined to include all personnel whether they are permanent temporary, paid or voluntary, regularly employed or substituting, or full-time or part-time. The certification process requires screening of school employees on initial employment and subsequently at intervals specified by the local Health Officer. Certification of freedom from tuberculosis must be by a licensed physician or a health agency.

*(Above information submitted by the Washington County Health Department)*

Employees can have the test performed by a licensed physician or health agency of their choice. WCPS partners with Health @ Work to provide this service by appointment. If you wish to use Health @ Work for this testing, please call them at 240-313-9910.

The physician performing the test can use the form below or a form of their choice to report the test results.
